-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on Amendment filed September 19, 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 6) ☐ Other: _____.

DETAILED ACTION

1. Applicant's amendment and accompanying remarks filed September 19, 2006 are acknowledged.
2. Examiner acknowledges amended claims 1 and 6-7.
3. Examiner acknowledges cancelled claim 3.
4. Examiner acknowledges newly added claims 8-22.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1 and 4-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Kobori et al., U.S. Patent Number 6,603,140.

Kobori discloses an organic EL device comprising a substrate having an anode, a hole transporting layer, a luminescent layer, an electron transport layer and a cathode (see column 571, reference example 1). Reference claim 7 discloses that there are two light emitting layers including a bipolar light emitting layer wherein the bipolar light emitting layer is disposed near a hole transporting layer or the bipolar light emitting layer is disposed near the electron

Art Unit: 1774

transporting layer as per instant claim 5. Also, reference claim 10 discloses that at least one of the at least two light emitting layers is doped with a dopant. Column 41, lines 19-24 of the Kobori reference discloses that the light emitting layers have a thickness of 5 to 100 nm wherein the total thickness of the light emitting layers is 60 to 400 nm. The reference discloses in column 33 that the electron injection and transportation layer can be used as a light emitting layer (see column 33, lines 49-50. Also, it is disclosed in column 21, lines 60-68 that the electron injection and transportation layer can be 1/10 to times that of the light emitting layer.

Response to Arguments

7. Applicant's arguments filed September 19, 2006 have been fully considered but they are not persuasive. Applicant argues that the amended claims recite that the doping layer has a thickness greater than the thickness of the non-doping layer. The Kobori reference discloses that the light emitting layer is comprised of two (2) layer wherein at least one of the layers has a dopant. Additionally, the reference discloses that the electron injection and transportation layer can act as a light emitting layer and can be 1/10 the thickness of the light emitting layer which is from 5 to 100 nm. The Kobori reference still reads on the instant claims. The rejection is maintained.

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 1774

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
